

A large, bright sparkler is the central focus, with its golden sparks radiating outwards against a dark blue background. Other smaller sparklers are visible in the distance, creating a bokeh effect of light spots.

# Illumination Fund

We believe that our Project Heart philanthropy program has the power to unleash the maker, doer and giver inside of every student and we want to invest in their ideas that have the power to transform their communities. That's why the Illumination Fund was designed specifically to support student-led projects that come from their Project Heart experience..

**Must be an  
active user of  
Project Heart**
