

WE'RE ON A MISSION TO CHANGE THE WORLD...

ONE CLASSROOM AT A TIME.

We know that true transformation in our world begins with education.

That is why we created Project Heart, our philanthropy education curriculum that teaches young people that they have the power and ability to create real, lasting change in their communities and the world.

Designed by Experts

Project Heart was developed by teachers for teachers, for 4th-12th grade classes with an emphasis on student-centered learning. The curriculum aligns with Common Core State Standards and follows an Understanding by Design (UbD) framework, helping teachers teach to requirements while creating an impact in their classroom and students. Project Heart is ideal for Project-Based Learning environments.

Creating Change that Lasts

Project Heart teaches students that they have the power, ability and responsibility to be life-long philanthropists who create change in their communities and the world. Building on the concept that everyone has time, talent and treasure to give to a cause or need, Project Heart taps into every child's innate desire to give, while providing them with the tools and framework they need to be tomorrow's world-changers, today.

Flexible and Adaptable

Project Heart was designed to fit into a teacher's lesson plan – not the other way around. Whether it is by weaving the concepts of Project Heart into a pre-created lesson or adding Project Heart as a weekly unit, the curriculum is easily adaptable to every classroom.

No Strings Attached

Project Heart is valued at over \$500, but it is our gift to teachers everywhere. Our innovative curriculum will always be available to teachers at no cost so that they can focus on doing what they do best – inspiring kids to change the world.

Making Learning Personal

Project Heart connects teachers and students on a deeper level. Through each activity and lesson, students are challenged to think and act differently, applying a new filter to the world around them. Project Heart personalizes each student's learning experience, encouraging young people to take ownership of their impact projects and their ability to make a difference.

A Front-Row Seat to Changing the World

By teaching Project Heart, teachers have the opportunity to have a real and tangible impact not only on their students but students around the world. By sharing their experiencing using the curriculum, we are able to continue to enhance the materials and fine tuning lessons so that we can reach even more students.
